Bench.it

THE PERFORMANCE QUESTION

Which version is actually faster?

AI can write the code.
You still need the experiment.

01 Build the benchmark

02 Isolate the work

03 Compare the evidence

Bench.it

A WORKBENCH FOR PERFORMANCE EXPERIMENTS

Turn a question into a measurement.

01 / DESCRIBE

Define the work.

Operation + input sizes

02 / GENERATE

Inspect the code.

Benchmark code from Gemini

03 / MEASURE

See the evidence.

Connected hardware + visual results

- Compare implementations
- Investigate performance
- Teach CPU behavior

Before you optimize, measure.
